A 92.9/6: 7. :1111-E

HATCHERY PRODUCTION OCTOBER, 1959

Production of chicks by commercial hatcheries during October was down ll percent from October 1958 but was up 22 percent from the 1953-57 average for the month. The number of broiler-type chicks hatched was down 10 percent from October a year earlier. The number of egg-type chicks hatched was down 15 percent.

The number of broiler-type chicks produced during October totaled 119,667,000, compared with 133,512,000 in October 1958. Production of broiler-type chicks January through October totaled 1,547,826,000--1 percent more than during the first 10 months of 1958. Egg-type chicks hatched in October totaled 14,375,000, compared with 16,904,000 in October 1958--15 percent. Production January through October totaled 518,528,000--7 percent less than the same period in 1958.

The demand for chicks, both broiler-type and egg-type, continues below that of a year ago, and smaller November hatches than last year are in prospect. The number of broiler-type eggs in incubators on November 1 was 5 percent less than a year earlier, and the number of eggs for egg-type chicks was 11 percent less.

Poult Production

Heavy breed poult production during October was up 33 percent from October 1958. Heavy white poult production during October of 849,000 poults was 40 percent larger than in October 1958. The hatch of other heavy breeds (mostly bronze) of 116,000 was 3 percent less than in October last year. For the year to date, January through October, the hatch of all heavy breed poults totaled 70,153,000--1 percent more than a year earlier. Heavy white breed production January through October was up 31 percent, but other heavy breeds were down 7 percent. The number of light breed poults hatched in October totaled 306,000, 35 percent less than October 1958. The January through October hatch of light breed poults at 15,006,000, compared with 12,903,000 hatched during the same period last year. The cumulative hatch of all turkey poults January through October totaled 85,159,000--3 percent more than were hatched during these months in 1958.

Turkey eggs in incubators on November 1 indicate that the number of heavy breed poults hatched in November will be larger than a year earlier. The hatch of light breed poults will be smaller.

1/ Heavy white breeds include heavy white-feathered breeds, such as Broad white,
white Holland, Empire white, Lancaster, and crosses with light white breeds. All
other heavy breeds are reported under "other." Light breeds include Beltsville,
Jersey Buff, Royal Palm and wild turkeys.

2/ Preliminary.
